Q: Q: Hi, I need to access the usb superdrive user guide, but the pdf file appears to be corrupted. (try it yourself, link below:) is there any other way to get the guide? thanks! E MacBook Air, usb superdrive -dvd player Posted on Jan 13, 2013 2:47 AM Answer I've had this question too (25) I have this question too Me too (25) The content of this page will be from 1 January 2013 to 31 December 2014. Try this on the external website > January 13, 2013 2:54 Reply Useful Topic Response - more options January 13, 2013 Or, open the viewfinder and click the Up arrow next to it on the left side of sidebar.4) Unplug the drive from the USB port. If the drive does not work or spits out CD/DVD discs moments after insertion, the drive is defective or Air does not put enough power on the USB port for full power. In this case, buy an external DVD drive that is connected to a USB port. Everything will work on any Mac computer. You don't need to sell or apple name it to work on your Mac.
